

a LCK: reduced strength 0.004; rank 5/4
width 0.2, alpha 0.20; 71 signed ODE edges

b CDH2: reduced strength 0.032; rank 3/3
width 0.2, alpha 0.15; 93 signed ODE edges

● exposure A ● outcome proxy W — negative effect — reconstructed — cross effects, labelled by source
● treatment proxy Z — positive effect ● observed - - self effect (with baseline)
